LINKSMART WITH San-a-Key®

Three Ways to Clean With One Simple Push of a Button

Choose one of three options for an always-clean KSI LinkSmart Keyboard

Option 1: Cleaning Button Only

Our no-software option allows for efficient disinfection of the keyboard just by pressing our red LinkSmart cleaning button

Option 2: Cleaning Button and San-a-Key® Lite Software

KSI's no-cost San-a-Key® Lite software download adds access to scheduled cleaning, onscreen end user cleaning prompts, and an animated cleaning aid

Option 3: Cleaning Button and San-a-Key® Licensed Enterprise Software

Choose our Enterprise San-a-Key® option when you need all the features of our Lite software, plus powerful analytics that comprise a total infection control program

All KSI-1700 SX, KSI-1800, and KSI-2000 Series Keyboards Supported

Download San-a-Key® Cleaning Software at ksikeyboards.com

With San-a-Key®, your KSI LinkSmart keyboard will always be clean, no matter which option you choose.

Option 1: Cleaning Button Only

- Connect the keyboard to your computer using the wired or detachable USB
- Push the red LinkSmart cleaning button to disengage keys (green LEDs will blink, indicating the keyboard is in cleaning mode)
- Using approved cleaning products, wipe, scrub or spray the keyboard surface
- Wait 3 seconds for keys to reengage and LEDs to stop blinking
- The keyboard is ready for normal input

Option 2: Cleaning Button and San-a-Key® Lite Software

- Connect the keyboard to your computer using the wired or detachable USB
- Visit ksikeyboards.com and follow prompts to download our no-cost, 64-bit San-a-Key® Lite software
- Once installed, a red keyboard icon will appear in the Windows tray
- Right-click the icon to set software options and enable scheduling
- Push the red LinkSmart cleaning button to disengage keys (green LEDs will blink, indicating the keyboard is in cleaning mode)
- An onscreen keyboard schematic appears, colored black with red keys
- Wipe, scrub or spray the keyboard surface to disinfect
- Red keys change to black as San-a-Key® detects each key being depressed during the cleaning process, until all keys are black
- Wait for the onscreen status bar indicator to complete the cleaning cycle
- The keyboard is ready for normal input
- Note the keyboard icon in the Windows tray changes from red to green, indicating a clean keyboard until the next scheduled cleaning

Option 3: Cleaning Button and San-a-Key® Enterprise Software

- San-a-Key® Enterprise Wide Analytics is a multifaceted network solution
- Know when, where and by whom your KSI LinkSmart keyboards are cleaned
- Collect analytic data in an SQL database or spreadsheet
- Generate detail and graphical reports that document IP compliance
- Contact KSI to make San-a-Key® Enterprise analytics an integral part of your healthcare facility's infection prevention program
