

*Security tailor-made for banking and finance*

Identity management tools engineered to optimize desktop security

Strong, multi-layered authentication

Fraud prevention and data protection

Integrated solutions for password replacement

*Foolproof single and dual authentication made simple*

**KSI SECURITY PRODUCTS ARE CRITICAL TO THE ELIMINATION  
OF INTERNAL AND EXTERNAL CYBER THREATS**

# KSI-1700 SERIES

Never before has a peripheral done so much to secure the banking desktop, advance employee productivity, and enhance service to the customer.

From Main Street to Wall Street, KSI takes the lead in offering award-winning, technologically-advanced keyboards and security pods that safeguard banking, electronic trading, and financial information systems. Unlike conventional keyboards or pods on the market today, KSI integrates state-of-the-art biometrics, RFID, and sonar auto-logout in one device. Multiple layers of foolproof authentication routed through one USB eliminate the need for password management and free up thin and zero client ports. Our innovative Technology Top Strip allows the integration of multiple security components – delivering an abundance of mix-and-match options for physical access control, data protection, fraud prevention, elimination of employee theft, and compatibility with leading security applications.

KSI partners only with the best of the best component providers in bringing the financial sector top-notch products. A purchase with KSI is an investment in quality and workmanship, backed by a 3-year warranty you can bank on.

## CONTACTLESS RFID

### KSI-1700 HB-03

RF IDEas™ 6082 125Khz Card Reader

### KSI-1700 HB-16

RF IDEas™ 80582 Dual Band 125Khz and 13.65 Mhz Card Reader

HID integrated readers by RF IDEas™ read most common physical access badges for use in lieu of cumbersome passwords.

Fast tap in, tap out. RFID integration allows a clean, clutter-free desktop and less chance of a standalone reader being lost, broken, or stolen.

**RF IDEAS**

# BIOMETRIC SECURITY

## WITH THREE INTEGRATED FINGERPRINT SENSOR OPTIONS

Select from three top-quality 500 dpi fingerprint sensors that provide the highest level of biometric security available today. KSI partners with manufacturers offering rugged components that stand up to heavy repeated use in the commercial setting.

### KSI-1700 FFB

Crossmatch™ pro-grade silicon-surfaced FIPS 201 compliant sensor

### KSI-1700 TTB

Lumidigm® multispectral optical fingerprint sensor, with foolproof image capture

### KSI-1700 UB

SecuGen FIPS 201 next-generation technology, with high image quality fingerprint optics

## DUAL FACTOR AUTHENTICATION RFID AND BIOMETRICS IN ONE DEVICE

Customers seeking the security of dual factor authentication in one device needn't look further than KSI-1700 series keyboards and KSI-1900 series standalone security pods. The combined use of RFID (via legacy badges, HID iClass, or contactless smart cards) with safe and irrefutable fingerprint biometrics makes for one of the fastest, most accurate, and secure logon solutions available to prevent fraud and ensure proper access to consumer account data.

# SECURE WALKAWAY SONAR LOGOFF

## SonarLocID® Technology makes logoff quick and easy

KSI's SonarLocID® is state-of-the-art presence detection technology that facilitates secure and convenient logoff. Automatic logoff is triggered when a user physically moves away from the desktop. The keyboard locks and is automatically secured. Distance and timing of workstation logoff is adjustable. Upon approach to the desktop, the keyboard's proximity sensor prompts a user to enter security information. An articulating version of SonarLocID® allows a user to accurately direct the range of sonar detection. SonarLocID® offers the banking sector an integrated solution – convenient, time-saving logoff that ensures a secure, tamper-proof workstation.

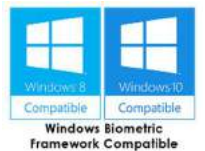

## KSI-1900 STANDALONE SECURITY POD Dual Authentication in One Compact Design

- RF IDEas WaveID™ and biometrics in one device
- Convenient, contactless identification
- Eliminates time-consuming password management
- Compatible with leading security applications
