

**THREE WAYS TO CLEAN WITH ONE SIMPLE PUSH OF A BUTTON**

**Choose one of three options for an always-clean LinkSmart™ Keyboard**

**1**

**OPTION 1: CLEANING BUTTON ONLY**

Our no-software option allows for efficient disinfection of the keyboard just by pressing our patented red LinkSmart™ cleaning button

**2**

**OPTION 2: CLEANING BUTTON and SAN-A-KEY® CLIENT SOFTWARE**

KSI's no-cost San-a-Key® Desktop Client software download adds access to scheduled cleaning, onscreen end user cleaning prompts, and an animated cleaning aid

**3**

**OPTION 3: CLEANING BUTTON and SAN-A-KEY® LICENSED ENTERPRISE SOFTWARE**

Choose our Enterprise Wide San-a-Key® option when you need all the features of our Client software, plus powerful analytics that comprise a total infection control program

**San-a-Key**®

**LINKSMART**™

**All KSI-1700 SX Series and KSI-1800 SX Series Keyboards Supported**

**DOWNLOAD KSI CLEANING SOFTWARE AT  
WWW.SANAKEY.COM**

# WITH SAN-A-KEY®, YOUR LINKSMART™ KEYBOARD WILL ALWAYS BE CLEAN, NO MATTER WHICH OPTION YOU CHOOSE

1

## OPTION 1: CLEANING BUTTON ONLY

- Connect the keyboard to your computer using the detachable USB
- Push the red LinkSmart™ cleaning button to disengage keys (green LEDs will blink, indicating the keyboard is in cleaning mode)
- Using approved cleaning products, wipe, scrub or spray the keyboard surface
- Wait 3 seconds for keys to reengage and LEDs to stop blinking
- The keyboard is ready for normal input

2

## OPTION 2: CLEANING BUTTON and SAN-A-KEY® CLIENT SOFTWARE

- Connect the keyboard to your computer using the detachable USB
- Visit <http://sanakey.com> and follow prompts to download our no-cost, 64-bit Desktop Client San-a-Key® software
- Once installed, a red keyboard icon will appear in the Windows tray
- Right-click the icon to set software options and enable scheduling
- Push the red LinkSmart™ cleaning button to disengage keys (green LEDs will blink, indicating the keyboard is in cleaning mode)
- An on-screen keyboard image appears, colored black with red keys
- Wipe, scrub or spray the keyboard surface to disinfect
- Red keys change to black as San-a-Key® detects each key being depressed during the cleaning process, until all keys are black
- Wait for the on-screen status bar indicator to complete the cleaning cycle
- The keyboard is ready for normal input
- Note the keyboard icon in the Windows tray changes from red to green, indicating a clean keyboard until the next scheduled cleaning

3

## OPTION 3: CLEANING BUTTON and SAN-A-KEY® ENTERPRISE SOFTWARE

- San-a-Key® Enterprise Wide Analytics is a multifaceted network solution
- Know when, where and by whom your LinkSmart™ keyboards are cleaned
- Collect analytic data in an SQL database or spreadsheet
- Generate detail and graphical reports that document IP compliance
- Contact KSI to make San-a-Key® Enterprise Wide Analytics an integral part of your healthcare facility's infection prevention program
