KSI-1801W SX
PAIRING INSTRUCTIONS

How to Pair Your Wireless KSI-1801W SX

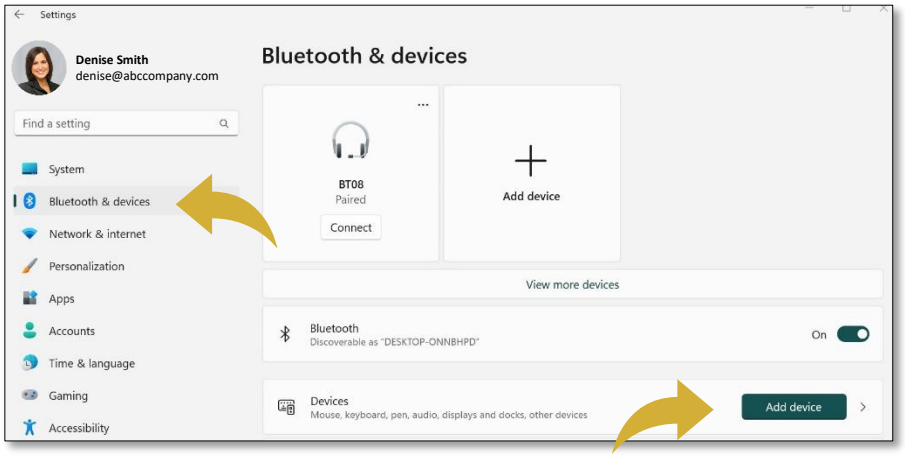

Pair Via Radio Frequency

- Plug the included RF dongle into an available Type A USB port on your computer
- Press and hold Fn + R on the keyboard
  The two left LEDs will flash once, pause, then flash for several seconds before turning off
- RF pairing will display in Windows 11 Settings > Devices > Bluetooth & devices
- RF is now paired, and the keyboard is ready for wireless input

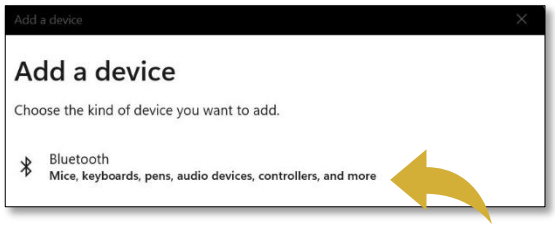

Pair with Bluetooth

- Press and hold Fn + B on the keyboard to invoke pairing mode for Bluetooth
  The two right LEDs will flash once, pause, then flash three times
- Go to Windows 11 Settings > Bluetooth & devices > Add device
- Click “Add device”

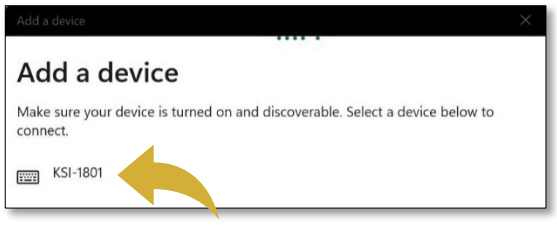

Pair with Bluetooth – continued

1

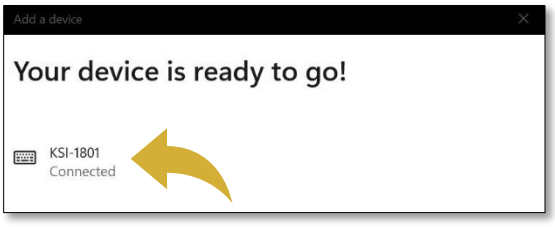

Click on Bluetooth

2

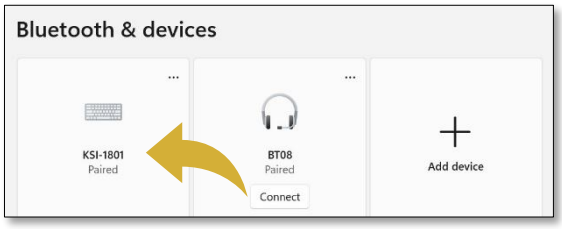

Windows 11 will find the keyboard

3

The keyboard is paired

4

KSI-1801 displays as paired, ready for input

Reconnect Wireless

To conserve battery life, RF and Bluetooth go into sleep mode after 15 minutes without input

Reconnect RF

- Ensure RF dongle is present in the USB port of your computer
- Press Fn + R > the two left LEDs will flash once, pause, then flash for several seconds before turning off

Reconnect Bluetooth

- Press any key to reconnect

Note

- To conserve battery life, backlighting and LEDs are nonoperational after pairing while in wireless mode.
- To determine whether num lock is on, press Fn. If num lock is on, the left LED will light.
- To determine whether caps lock is on, press Fn. If caps lock is on, the middle LED will light.
- To determine whether scroll lock is on, press Fn. If scroll lock is on, the right LED will light.

✓ Connect keyboard via USB cable to charge battery
✓ Battery is fully charged after five hours of charging
✓ Lithium battery standby time ≈750 days
