LINKSMART® WITH San-a-Key®

AWARD-WINNING HEALTHCARE TECHNOLOGY

KSI's patented LinkSmart® with San-a-Key® Healthcare Technology System is the most advanced method for controlling infection at the desktop and preventing cross contamination – without the inconvenience of removing keyboards from service to wash in a sink or dishwasher.

Clinicians are now enabled to know when, where, and by whom a KSI keyboard surface was cleaned, on a real-time and historic basis, throughout the entire facility. Desktop push notifications remind end users when it's time to disinfect according to user-defined scheduling.

A simple push of our distinctive, red LinkSmart® button is all it takes to begin the cleaning process using EPA-approved wipes already in use at your hospital. Keys are temporarily disengaged, allowing the freedom to wipe down the keyboard surface without entering errant data.

## ENTERPRISE-WIDE ANALYTICS HELP PREVENT INFECTION

A powerful adjunct to the LinkSmart® button, optional San-a-Key® analytics software puts hospital administrators in full control of infection prevention and capturing meaningful cleaning data. Key features of San-a-Key® include:

- User-defined, scheduled cleaning
- Scheduled push notifications that remind end users it's time to disinfect
- An animated, onscreen aid that facilitates user cleaning
- Real-time capture of when, where, and by whom KSI keyboards were cleaned
- Customized reports that amalgamize data and help to spot infection trends
- Health IT and Windows 64-bit compatibility

DISINFECTION OF THE KEYBOARD SURFACE HAS NEVER BEEN EASIER OR MORE EFFECTIVE

THE LINKSMART® BUTTON TEMPORARILY DISABLES KEYS FOR FAST & EASY DISINFECTION WITH WIPES

SAN-A-KEY® PUSHES SCHEDULED CLEANING REMINDERS TO DESKTOPS THROUGHOUT THE FACILITY

AN ANIMATED, ONSCREEN SAN-A-KEY® CLEANING AID GUIDES USER DISINFECTION

ENTERPRISE-WIDE SAN-A-KEY® CLEANING DATA IS AMALGAMATED AT THE SERVER

SAN-A-KEY® ANALYTICS ARE USED TO SPOT INFECTION TRENDS THAT IMPACT PATIENT CARE

ADMINISTRATORS KNOW IN REAL TIME WHEN, WHERE, AND BY WHOM KSI KEYBOARDS ARE CLEANED

DOWNLOAD FREE SAN-A-KEY® LITE SOFTWARE AT WWW.SANAKEY.COM

System Requirements – Windows® 8, 10, 11 Linux, Apache, or MySQL® Server

Compatible Exclusively with KSI-1700 SX Series, KSI-1800 SX Series, and KSI-2000 Series Keyboards
