FOR IMMEDIATE RELEASE

KSI Keyboards and AuthX Unveil Technology Collaboration at HIMSS24 Conference

Orlando, FL - March 5, 2024—KSI Keyboards, a leading provider of advanced healthcare keyboard solutions, and AuthX, a pioneer in secure authentication technology, are thrilled to announce their partnership just in time for the HIMSS24 conference in Orlando, FL, to be held March 11 to March 15, 2024.

The collaboration brings forth a leading-edge integration of technology, aimed at enhancing passwordless security and efficiency in healthcare settings. Through the new partnership, compatibility of KSI products – featuring integrated RFID and fingerprint biometrics – with AuthX's groundbreaking single sign-on (SSO) platform provides healthcare professionals with seamless access to critical systems and applications while protecting endpoints with multifactor security.

Commenting on the collaboration, AuthX President, Preetham Gowda, expressed his excitement, stating, "At AuthX, we're dedicated to revolutionizing healthcare authentication. Teaming up with KSI Keyboards allows us to extend the reach of our innovative SSO technology, ensuring healthcare providers can access patient data quickly and securely."

KSI's Product Manager, Deanne VanKirk, also shared her enthusiasm for the collaboration, saying, "We're delighted to partner with AuthX to deliver integrated solutions that meet the unique needs of the healthcare industry. By combining the reliability and functionality of KSI Keyboards with AuthX's advanced authentication capabilities, we're empowering healthcare professionals with tools that protect endpoints while streamlining workflows."

The HIMSS conference serves as the perfect platform for KSI Keyboards and AuthX to showcase their joint offering to health professionals and industry experts. Attendees can visit KSI booth #3441 and AuthX booth #863 to experience firsthand how the companies are shaping the future of healthcare desktop security.
