

FOR IMMEDIATE RELEASE:

KSI Launches Silicone Authentication Wristband for Healthcare

San Leandro, CA (April 11, 2023) – KSI Keyboards (KSI), a leading manufacturer of infection control and security peripherals for healthcare, today announced the launch of a new, hospital-grade, silicone wristband designed for contactless authentication of healthcare providers.

The new wristband features an integrated NXP MIFARE® DESFire EV3 chipset compatible with KSI peripherals featuring RFID readers – including keyboards and standalone security pods. The new offering provides clinicians with a convenient, secure, and hygienic means to log into healthcare networks while providing patient care.

Deanne VanKirk, KSI Product Manager, said, “We’re thrilled to introduce our new wristband as a cost-effective, seamless solution for secure login by clinicians. With its durable, tamper-resistant design, the wristband stands up to continuous use and is part of a hospital’s robust identity management strategy.”

The new wearable helps keep hospital workers’ hands free so they can focus on patient care. Its always-on design makes it less likely to be lost or stolen, when compared to traditional badges. The multipurpose band can also be programmed for other uses, such as time and attendance, building access, and more.

“KSI’s new wristband features next generation MIFARE® DESFire technology, compatible with NFC, 125 MHz, and 13.56 MHz RFID readers,” added Ms. VanKirk. “Our solution is easily integrated into existing healthcare systems, offers fast, secure encrypted data transmission, and helps prevent insider man-in-the-middle attacks.”

Versatile as a wearable, the wristband can be worn beneath various fabrics and latex gloves, ensuring its functionality in healthcare settings.

KSI’s new wristband is part of the company’s commitment to providing innovative, high-quality solutions for the healthcare environment.

About KSI Keyboards

Headquartered in San Leandro, CA, KSI Keyboards has delivered high-end peripherals to corporate and healthcare customers around the world for more than 40 years. The company services the healthcare and finance sectors with smart products featuring integrated biometric and RFID security. Technology partners include Imprivata®, HealthCast, Epic and CDW Healthcare. KSI products offer compatibility with leading SSO platforms and compliance with HIPAA and DEA ePrescribe standards.

The LinkSmart® cleaning button with San-a-Key® analytic software was awarded AHE Innovation of the Year, sponsored by American Hospital Association. Most recently, KSI was

recognized as a Top 10 Multifactor Authentication Solution Provider for 2023 by Enterprise Security magazine.

KSI's mission is to enhance the user experience, secure the desktop, and help save patient lives while meeting rigorous government regulations with total customer satisfaction.
