bioLock

SAP®

KSI Keyboards are compatible with Nymi Band™

KSI + bioLock offers SAP® access
and transaction control, data protection, and accountability

KSI + bioLock eliminates the dangers of unauthorized access

KSI-1700 NY
SECURITY KEYBOARD

Secures shared workstations
Prevents data breaches and leaks
Granular control of SAP® checkpoints
Durable, ergonomic keyboard speeds workflow
Nymi Band™ compatible for touchless authentication

Solution requires no special training
bioLock creates an audit trail of access
Government compliant biometric solution
Supports GDPR, SOX, POPI and other privacy laws
Nymi Band™ can be worn under PPE to authenticate

KSI + bioLock presents an authentication and reauthentication solution that can't be shared, borrowed, stolen, or hacked. Nymi Band™ puts security and convenience on your wrist with a biometric wearable.

Encrypted biometric authentication and reauthentication restricts data access within SAP®

Execution of SAP® Digital Signature is fast, secure, and convenient

Authentication with the KSI keyboard and Nymi Band™ is simple and intuitive

Protects any SAP ERP Transaction and Function

Financial Accounting and Controlling | Sales and Distribution

SECURE SAP® LOGON AND REAUTHENTICATION

DESKTOP LOGON >

Users log into Windows Hello using the Nymi Band™ and KSI keyboard with embedded biometric reader technology

SAP® LOGON >

Access to the SAP® platform is controlled by biometrics and bioLock software hard coded within SAP® ABAP programming language

REAUTHENTICATION >

bioLock prompts users to reauthenticate throughout the day, utilizing the Nymi Band™ and KSI keyboard to execute protected SAP® transactions
